CGMA Interactive Day'19

Name: Goh Jo Ey

Matric: A19EC0047

Program: Computer Science (Graphics and Multimedia Software)

Program Code / Year: SECV / 2

Academic Advisor: Dr. Mohd Razak Bin Samingan

1. Justification in joining the activities

On October 12th, 2019, the Computer Graphics and Multimedia Association (CGMA) organized an event called CGMA Interactive Day (CID). CID is an offline activity that takes place at L01, Dewan Sri Merbau at Kolej Tun Hussien Onn. The program began at 8:00 a.m. and finished at 10:00 p.m. The number of members involved in this program is about 120 members which includes around 100 participants from the first year and around 20 committee members from the second year. The goal of this activity is to enhance the association's relationships among its members. This event is conducted to welcome first-year computer graphics and multimedia students to the university. As a result, I was involved in this activity as a participant.

2. The Graduate Attributes that are focused on

a. Communication Skills

Communication skills are one of the graduate traits that this curriculum emphasises. The participants are separated into numerous groups to complete the program's activities together. We must engage with one another, and I have discovered that communication skills are really vital in this section. In order to complete the activities, the participants must work together to discuss strategies and ideas. For example, team members are expected to brainstorm ideas for a meme, poster, and soundtrack for the activity. We need to do the task in a timely manner, thus excellent communication is critical.

b. Thinking Skills

By joining this activity, thinking skills are developed as we need to complete the task in the specific time give. Every team needs to present their completed task. For instance, the group needs to produce their logo, cheers, and straw bridge in a short time. In order to do so, the team members need to gather their ideas and organize them effectively to produce the best solution for the task given. Creative thinking is important in this activity as we need to think out of the box and solve the problems together.

c. Leadership and Teamworking Skills

For the program, we are divided into a group with several members per group, and a team leader is selected to guide the group. The team leader is selected to monitor the progress and direct the team to make sure everything runs smoothly in the group. Besides, the teamwork of the group is very important to result in effective and cooperative work. The supports and cooperation between the team members are required throughout the program to make sure every member works effectively with each other. Teamwork is also very important in order to deal with conflicts and maintain a harmonious atmosphere.

3. Content of the activities

At 7.30 am, all of the participants gathered at Dataran Resak, KTDI. The program started at 8.00 am on 12th October 2019. The participants travel to the Dewan KTHO by bus. The program is started with the registration process at the hall. The first activity of the program is the Zumba dance. The committee members lead the participants to dance at the front stage. Next, the program continues with some ice-breaking sessions. The activity involves in the ice-breaking sessions is Abe Say. After that, we are divided into several groups. Every group is required to prepare their group logo, group cheers, and a straw bridge. After presenting the outcome, we are going to carry out another activity called Floor is Lava. The group is arranged in a line and we need to pass to the rubber band by using a straw from one to one. Next, we are going to have lunch at around 1.00 p.m. After enjoying lunch, the program is continued with the session game. It includes 4 games and we need to go to each station to complete the task as well as collect the point. In the evening, we complete the session game and move to another activity which is kayaking. Kayaking is the traditional activity of the CID program and the most interesting part. After that, we are having dinner and continue with the closing ceremony. During the closing ceremony, we also present the tasks that we have completed. The program is ended with the winner announcement.
