ExCEL Activity Report

CGMA Interactive Day 2019

Name: LEE HUI ZHONG

Matric No: A19EC0067

**Program: SECV Computer Science (Graphics and Multimedia
Software)**

Batch: 2019/2020

Academic Advisor: Dr. Jumail Bin Taliba

Justification in joining the activity:

Computer Graphics and Multimedia Association (CGMA) has held a CGMA Interactive Day (CID'19) on 12th October 2019 at Dewan Sri Merbau, KTHO. This event is to welcome the first year student of Computer Graphics and Multimedia Software course. Besides, the other objective of this event is to enhance the bonding between juniors and seniors by giving an opportunity to know each other through activities and games in this event. As a first year student, I am a participant in this event.

Graduate Attributes:

- a) Communication Skill: In this event, we are formed into groups to play games and activities together. I need to communicate with my groupmates when discussing idea to design our group logo and slogan. Good communication skill helped us to complete all the tasks easily and effectively because it can prevent misunderstandings among the groupmates.
- b) Thinking Skill: Thinking skill is one of the attributes being focused on this event. We need to think out of the box to find the best way when playing games to strike for higher marks for our group. For example, I and my groupmates apply our creativities in building a 'bridge' using straws. This activity required our thinking skill to build a strong and stable 'bridge' which can support the weights putting on it.
- c) Leadership and Teamworking Skill: As we work together as a group throughout this event, leadership and teamworking skills are very important. All of us have the chance to lead the other groupmates in completing each task such as draw logo, create a slogan, prepare a group performance and other activities. I need to cooperate with my groupmates in playing every games. A strong teamwork keeps us to complete every tasks successfully.
- d) Adaptability: I can adapt to new environment easier and faster through this event because it let me know more about Computer Graphics and Multimedia Software and I can know my course mates well when we play games together.

Content of the activity:

CGMA Interactive Day was held on 12 October 2019 from 8:00am to 11:00pm. The event was held and managed by the second year batch of this course. All of the first year students of this course are compulsory to participate this event as it is to welcome and celebrate together with seniors. There are many fun activities and games throughout this event to create bonding among all of the students. Other than that, one of the interesting activities which is also a tradition of the CID that is the kayak activity. This event has created an opportunity for the students to enjoy kayaking in UTM which is a memorable and valuable experience for all of us. Before the activity ended, all the groups will present their performances which shows the creativity of the students and have brought much fun to the event.
