PROFESOR DR. HABIBOLLAH BIN HARON

**PREPARED ON:**

20 APRIL 2021

Universiti Teknologi Malaysia (UTM) got to be the primary among open colleges to have Huawei Connected Campus for this year, 2020. The occasion was held at Dewan Sultan Iskandar, UTM Johor Bahru campus on 3rd March 2020. The one-day occasion had assembled more than 3000 understudies engaged in different activities including talk by Huawei pioneers, campus enlistment, and grandstand of Huawei items and arrangements. Me myself is one of the members felt pleasant since Huawei is one of the finest companies within the world.

The occasion begun with a brief discourse from our Vice-Chancellor, Prof. Datuk Ir. Dr. Wahid Omar where he accepted that this joint occasion composed by academia and industry was a great stage for UTM to learn and experience the future and to cultivate associations for the improvement of Malaysia's higher education, industry, society, and the whole nation. The occasion was also attended by Mr. Lim Chee Siong (Director of Huawei Cloud & AI Southern Pacific Region), Ms. Emily Peh (Senior Talent Development Manager Southern Pacific Region), Prof. Dato' Ir. Dr. Mohammed Rafiq Dato' Abdul Kadir (Dean of UTM Faculty of Engineering), and Assoc. Prof. Dr. Othman Ibrahim (Director of UTM Career Center).

After having a great visit to each given booth, I picked up a bunch of information on how AI works, and information been utilized in these businesses. I too had a great discussion with one of the Huawei representatives, Miss Lee who could be a trade chief of Huawei Johor department. From the discussion, I genuinely get it on how Huawei keep on rising in terms of generation and showcasing. Miss Lee moreover energized me to apply employments or internship at Huawei company in arrange to pick up more encounter and have a great working environment.

At that time, I was eager to join Huawei in future. And from my little information about data, I think Huawei conveys unified storage solutions for our largest enterprise applications and most demanding technical workloads. It gloats integration of block-level and file-level data storage, support for a assortment of storage protocols, and GUI-based central storage administration. I hope UTM could collaborate with Huawei once more to conduct this kind of occasion in future.

## Entry Ticket:

<b>NAME</b> Saharulnizam Hakimy	<b>TICKET TYPE</b> FREE Admission	 
<b>EVENT</b> Huawei Connected Campus 2020 @ Universiti Teknologi Malaysia, Johor	<b>ORGANISER</b> Huawei
