## **ExCEL Activity Report**

### **Creative'20: Video Workshop and Editing Contest (CREATIVE '20)**

Name: Mohamad Amin Hazeeq Bin Hisham

Matric Number: A19EC0087

Programme: SECP Bachelor of Computer Science (Data Engineering)

Batch: 2019/2020

Academic Advisor: Dr. Zuraini Binti Ali Shah

## **Programme Information**

**Date:** 13<sup>th</sup> - 27<sup>th</sup> of December 2020

**Venue:** Facebook Live

**Organiser:** Persatuan Mahasiswa Sains Komputer (PERSAKA) UTM

### **Graduate Success Attribute**

1. Communication Skills
2. Leadership and Teamworking Skills
3. Adaptability Skills

**Position:** Director of Creative'20 program

## Justification in Joining Activities

In October 2020, I had been planned to organize program as all members of PERSAKA committee must do to gain the leadership skills along the process of organizing event. In 9 November 2020, I created the group and making the proposal of program on what the program should be in the future. I invited several members of Persatuan Mahasiswa Sains Komputer (PERSAKA) UTM committee to be part of my team for the upcoming Creative'20 program in the end of the semester. The reasons I participated/organized in this event as a director and committee because I want to challenge myself to organize event that will bring students of School of Computing UTM to sharpen their skills in editing images or videos despite they learned coding and other academic subjects. Actually there are two activities in this program, it involved the video workshop and during that month also has editing contest program. The other reason is, I want to know how hard for regular people like me, will be able to construct and organize the program in Faculty of Computer Science community.

## The Graduate Attributes that are focused on

This event has focused on three Graduate Success Attributes which are the Communication Skills, Leadership Skills and Adaptability Skills.

In the event, one of the Graduate Attributes that was focused on was the communication skills, especially the “**communication skills**” in the Virtual Delegation committee. Be a leader or director of program we need to communicate a lot of people and need to give clear explanation during the proposal meeting and always keep it touch of all progresses from all small units under Creative'20. The most important when be a leader make sure our words is polite but still can make people to do on what we ask, don't harsh everyone in our team as it will make the connection of relationship become poor.

The event has also trained the “**leadership and team working**” skill of each committee member. A leader or director of program must construct the idea two step ahead and also think about the consequences, must lead the crews clearly and don't neglect responsibilities and know how to construct a good organization team and dividing all the tasks. In addition, being director

of program gained a lot of leadership skills by guiding and directing other committee members and crews before, during and after the event.

Lastly, the event trained the “**adaptability skills**”. Normally in many events we still will encounter the technical problems, last minutes’ decisions, many work and need to submit it in rush. Therefore, each committee will need to adapt and handle any tasks that they have not expected or not experience before.

## **Content of the activities**

The Creative’20 was organised by me under PERSAKA, with the aims of cultivate spirits to feel excited to gain new knowledge and unlock new creativity skill in editing, provide a medium for interested and talented students of School of Computing, UTM, in producing best quality videos and help to develop basic editing skills to students and unravelling secrets that they never knew before this. This event is to bring students of School of Computing UTM to sharpen their skill in editing images or videos despite we learned coding and other academic subjects, they also need to take a challenge to try new path of knowledge. It is to encourage students to gain new skill of editing knowledge that can be use in real life for example as their part-time job in community with their own creativity. The activities will involve video workshop from basic, teaching students of School of Computing UTM until they can produce their video themselves. During that month also has Editing Contest program held to give the opportunity for the students of computer science to challenge among themselves and express their creativity in producing video with the given theme.

The Video editing workshop was held on 13 December 2020 at (8:00pm – 11:00pm) and first one hour is the session where the speaker introduces the “Theory and Practical Shooting”. Next session is “Practical Shooting and Basic Editing”. After 13 December, the “Video Editing Contest” was started and ended after a week. The program got many supporters and I am not expecting it will go higher during the event.
