

ExCEL Activity report

Greeny green 7.0

Name : Chua Chen Wei

Matric Number : A19EC0038

Programme : SECP Bachelor of Computer Science (Data
Engineering)

Academic Advisor : Dr Azurah Bte A Samah

Programme Information

Date : 2nd August 2020 – 29th August 2020

Venue : Online Platform (Google Meet, Facebook Live, Zoom)

Organizer : AIESEC in Johor Bahru

Position / Role in Activities : Organizing Committee of Financial and Legalities

Graduate Attributes :

1. Leadership and Teamworking Skills
2. Thinking Skills
3. Communication Skills

Justification in Joining the Activities

During the first year of my university life, I joined AIESEC, which is a youth organization that provides young people with leadership development, cross-cultural internship and global volunteer exchange experiences. I wanted to develop my soft-skills as well as leadership skill and I am very interested in cross-cultural exchange to understand more about the culture and lifestyle in other country. In my second AIESEC term, I was assigned to be the organizing committee of Greeny Green 7.0 which is a global volunteer exchange programme that focused on Environmental Issues.

The Graduate Attributes that are Focused On

In this project, I developed multiple graduate attributes. One of them is **Leadership and teamworking skills**, we worked in a group of 6 including of the project director, and five other organizing committee, in the duration of the progress, we faced a lot of difficulties and challenges along the way especially when we are planning the project and also executing the project. I learned how to work in a team and **communicate** well to have a clear communication and sort things out in a regular meeting, I am able to voice out my opinion comfortably and listen to other's as well. Furthermore, I was given a chance to lead the volunteers and help and solve the problems that they faces by always consulting them and giving them guidance. The last Graduate Attributes that are focused on is **Thinking Skills**. In the process of planning of the project, I learn to think out of the box, we are required to be innovative and have critical thinking to make the project run smoothly.

Content of the Activities

In this project, we are doing a global volunteering exchange, where we will invite people from outside of Malaysia to volunteer in helping in the issues that are happening in Malaysia. Greeny Green 7.0 is a project that focused on SDG 13 Climate Action to tackle Climate Change. In year 2020, we have the COVID-19 outbreak all around the world, we are required to adapt and innovate our project during the planning phase into a Virtual Volunteering Exchange, where we run our project virtually. We have 4 Volunteer from Bangladesh , 2 from Indonesia , 1 from Sri Lanka and 1 from Malaysia. During the whole duration of project, we meet up and invite external partners which was Free Tree Society (FTS) and PYNG Zero Waste to give a training session to our volunteers to build up the quality of the volunteers and knowledge beforehand before the deliver any sessions to public. We helped the volunteer to organize online school workshop that involves 3 Local School and also Global Village which is an AIESEC iconic exhibition event to showcase the culture from different countries around the world. Webinars is also organized in Facebook live with external partners such as Forest City and Bye Bye Plastic Bags Singapore (BBPBS). During the duration of the project we also started an online competition to utilize the waste created in the household. To ensure the quality of the projects and also the wellbeing of the volunteers, we have to constantly do a “one-to-one” session every week where each of the OC will go into one – to – one space to understand how is the volunteer doing and provide them challenge and motivates them. In the meantime, we often haven some fun and chilling time together and fosten our relationship.
