Organized by: Computer Graphics and Multimedia Association (CGMA)

NAME	: QUDRI AMEER BIN MOHD SAFIEE
MATRIC NUMBER	: A19EC0150
ACADEMIC ADVISOR	: MISS NOR ANITA FAIROS BINTI ISMAIL

Boxtrolls 2020

Boxtrolls CGMA is an annual event organized by the CGMA. It is compulsory for students from each year who is part of CGMA committee. I was in my first year when participating the Boxtrolls 2020 which was held on 7th March 2020 at Dewan Kuliah 4, P19. The event was from 8 am until 5pm. There were so many activities which required all of students to work as a group assigned by the organizer. Student from the first year up until the fourth year were able to work together for the activities and challenges such as building prototype of technology by using only cardboard and newspaper based on the given theme.

Graduate Attributes

1. Communication skills

I was able to socialize with the seniors and other colleagues in order to know them better. It was also required in order to build a great chemistry for completing task and activities during the event.

2. Adaptability

As a junior, I am proud of myself being able to adapt with the environment where most of the people are new to me. Furthermore, the group assigned for me was a combined students from each year. That was a challenge for me to adapt with seniors but somehow I was able to manage myself.

3. Thinking skills

During one of the activity session where we must build a prototype of technology out of scrap and waste based on the theme given, I was able to apply and improve my thinking skills where I must expand my imagination in order to come up with a good idea.
