PREPARED ON :

29 February 2020

Gerakan Pengguna Siswa UTM held a team building program on 29th of February 2020 located at *Taman Rekreasi* UTM. This program involves all members of Gerakan Pengguna Siswa including the club advisor, En. Hasyiq. For this program, we were required to gather in *Taman Rekreasi* in the morning and then we were distributed into several groups. The purpose of this program is to strengthen the bond within club members seeing that most of us came from different faculties and years. So, most of us didn't know each other well enough. During this program, we have several activities such as jungle trekking, explorace and barbeque party. For the first activity which is jungle trekking, we were lead by a staff through the jungle and stooped at one point to cook for ourselves by group in the middle of the jungle by using bamboo.

For the second activity, we were required to finish all six sections with varieties of mission. For example, we need to find coins in a lake, solve a puzzle and carry one of our team members by using rope. For the barbeque party, most of the male members volunteer to grill the ingredients while the female members prepare the venue for closing ceremony. In closing ceremony, a few souvenirs were given to each groups and the program ended around 11.00 p.m.

As a participant in this program, I was happy that I decided to join because this activity enable me to get to know other people outside from my class. Other than that, by playing games together, we can get close to each other naturally since we need to have great teamwork in order to solve the missions given. Not only this program enhance our teamwork skills, it also enable us to improve our communication skill by communicating with strangers. In my opinion, we need to have more of this kind of activities in order to improve our graduate
