## Excel Activity Report

### Fun Science Dive 2021

Name: Mohamed Azim bin Mohamed Nazlen

Matriks number: A19EC0089

Course: Bachelor of Computer Science (Data Engineering)

Academic Advisor : Dr. Zuraini Binti Ali Shah

# Program information

**Organizer:** Kursus Sains dan Komuniti(04)

**Acceptance date:** 26 Mei 2021

**Venue:** Facebook Live

## **Graduate Success Attribute**

- Scholarship
- Enterprising Skills

**Position:** Participant

## Reason for Joining

I joined this activity because I had free time and I want to learn more about our industry. I heard that there was an interesting event happening about science, and the industry at large and I thought that it could help get a handle on how the world works. With all the deep science of computers and technical problems I was learning at the time, I needed something to give me more perspective, something to remind myself why I chose this course and bring my head out of the memory ram of a computer.

## Graduate Success Attribute

The Graduate Success attributes I have gained on this activity includes Scholarship and Enterprising skills.

The scholarship skills gained from this activity stems from the introduction of the larger world of science and technology the activity introduces me. It showed me the opportunities I have to further my education and horizons in the world. I do not have to continue my pursuit of a singular path and should expand my interest to other disciplines, not only data science. It also gives me inspiration to pursue more in depth in my own course, by giving me perspective on how my own discipline can benefit society as a whole with their interesting panel.

The many careers they have displayed during the panel gave me enterprising skills. They showed me a lot of avenues to apply my knowledge and skills in different industries and sectors of varying levels. It gave me the confidence to introduce my abilities to other parts of the communities and help them with many creative environments.

## Activities

The moderator introduced the panel and the agenda of the entire session. She gave us what to expect as well as any details as an audience we must need. Then after that the panel is fully introduced. Each of the panelists said their peace and contributed well to the conversation of science and technology in different industries and how it implies to us today especially in this time during a pandemic. After each panelist session, they answered questions from the audience which fully fleshed out their thoughts and opinions about certain topics and gave some really helpful advice to the future of the industry. They also presented prizes for a pass competition they held.
