## 1.0 Program Information

Date: 27/7/2019

Venue: N28

Organizer: PERSAKA UTM

## 2.0 Position in the activity

Role: attendant

## 3.0 Graduate attributes

### 3.1 Scholarship skill

The webinar session is all about user education and understanding of engineering. Not only that, it also involve with programming skill. Therefore this session is really giving knowledge on how input programming skill into a system or robot. Then the session taught about engineering on how to make your own robot which involve in developing circuit and so on.

### 3.2 Communication Skill

The sharing session provide a question and answer section with the student to ensure that everyone in the meeting get the full information about content of the session. The answer provided by the speaker in the session also loud and clears with the information. I as attendant feel that every student needs a good communication skill that can help them easily communicate or interact with other people.

### 3.3 Thinking skill

There is a time when the speaker gives a problem solving question which require us to form a group and try to solve the problem. The problem is involving with a creating design of robot that can execute specific task. When the times up, you need to present your idea in front of all student in the session. For me by doing this problem solving question, it really enhance my creative solution and thinking skill.
