I am a highly potential fresh graduate from Bachelor of Technology with Education (Living Skills) from University Technology of Malaysia. I have a great communication skill and a very detail-oriented who has been working in part-time job. I have learnt, practiced and improved my skills from my previous education days and moving forward. In my university days also, I had been very active as I love to seek more knowledge and skills as much as possible to overcome my fear and limit. Being flexible and observant also have been my biggest strength to ensure that I can work with the community itself to create stronger bond in achieving goals. Thus, working with these amazing team can increase more new potential in future.
