

IR 4.0

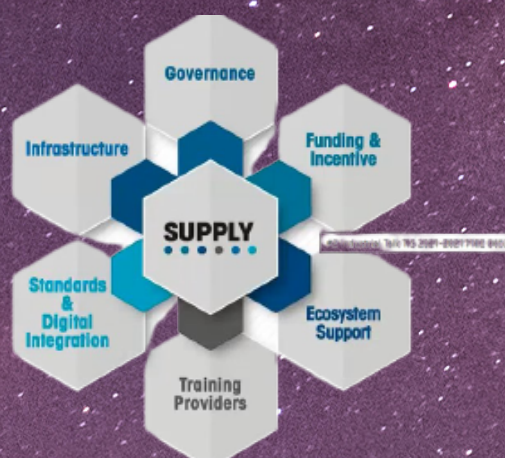

In recent decades the manufacturing sector has been through massive evolution, for mass production thought the use of robotics to increase efficiency and constantly evolving with more and more in fusion of automation

BABY TAYLOR FINN

Cyber security Malaysia has set their goals in order to develop into 1st class countries like JAPAN and others. CSM has taken adequate measures such as global economy order and technology advancement.

Malaysia has already set their frame for the next 10 years already. The national goals of this framework are labour productivity growth, manufacturing contribution to economy, high skilled jobs.

Even though Malaysia has many goals and many executive plans for the future but the problem still lies, the demand and supplies are still inadequate. Demands can be fulfilled by skill enhancement, innovation, awareness. Supplies can be fulfilled by funding and economic support infrastructure.
