

Project Name: Web Application for Period Poverty Crowdfund (HELPSHI)

Software House: GIT Group

Sprint Review Meeting

Date: 11 Dec. 2021 (Sprint #4)

Team Members & Stakeholders

Team Leader

Siti Fatimah Az Zahra
Binti Mohd Nizam

Scrum Master

Aqilah Hanim Binti
Mohd Taufik

Developer 1

Nur Hidayah Binti
Hamri

Developer 2

Nursyafiqah Binti Abdul
Halim

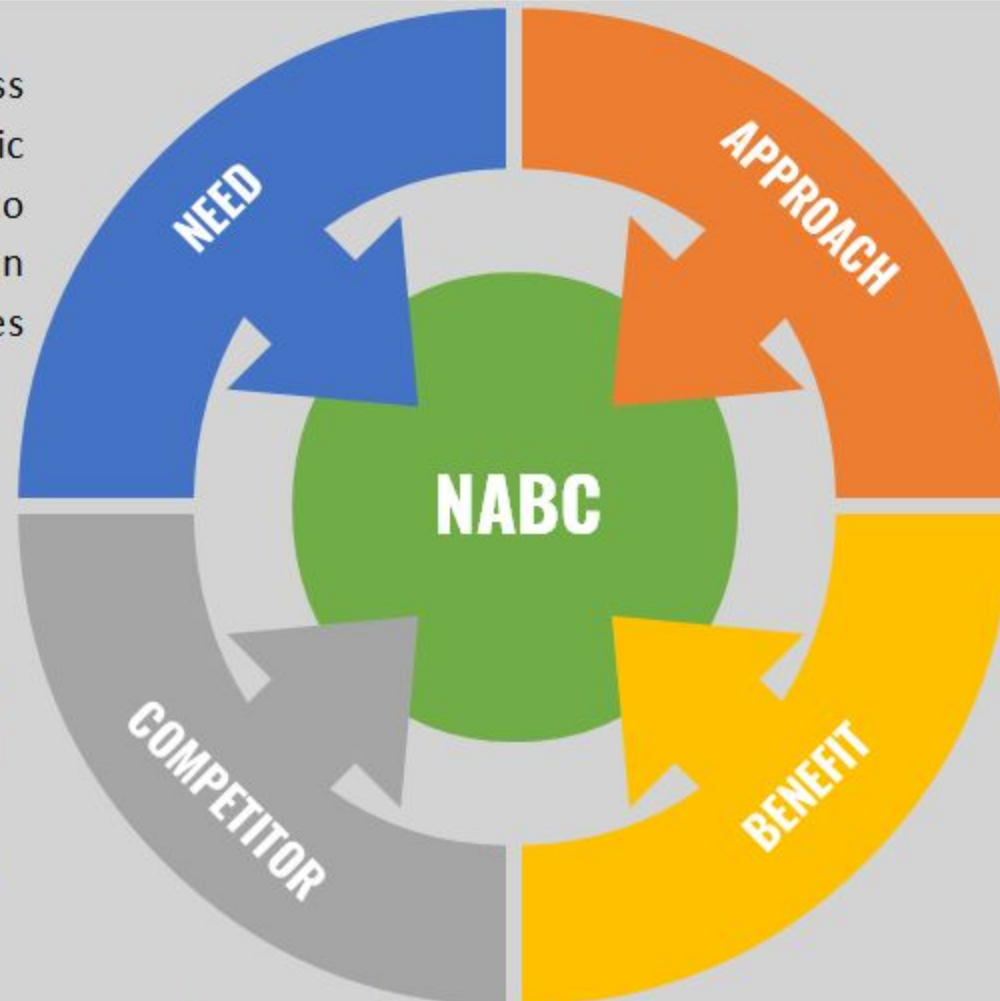

Product Owner and User

Ms Nurashikin (The She Society)

Introduction: NABC

Period poverty is the lack of access to safe and hygienic use of sanitary products due to financial constraints that has been side-lined in Malaysia as if it does not exist

Social media has been widely used as a platform to spread information this includes crowdfund campaigns and awareness.

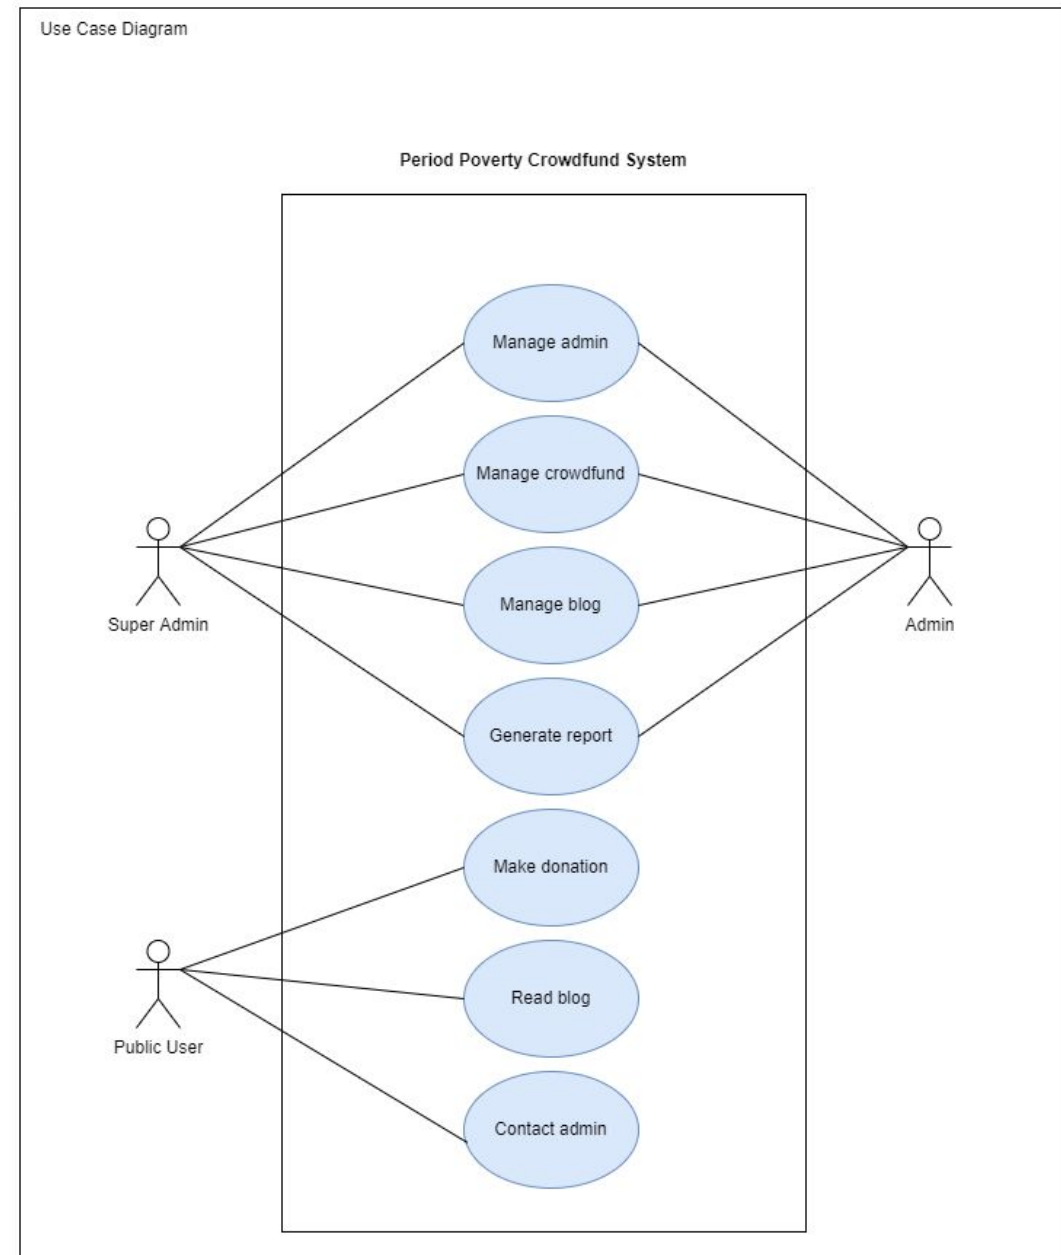

To develop a crowdfunding system that mainly focuses to tackle and raise awareness on period poverty called 'HELPSHI'

The benefits include to provide a designated platform to tackle period poverty, to raise awareness on this issue in Malaysia, to reach the targeted community easily and to encourage the attitude of helping each other

Introduction: Use Case Diagram

Two users: Super Admin, Admin and Public User

- Super Admin and Admin can manage account, manage crowdfund, manage blog and generate report.
- However, only super admin can delete other admin.
- Public User can make donation, read blog and contact admin.

Introduction: Development Tools

Tool	Descriptions
 Visual Studio Code	<ul style="list-style-type: none">• Streamlined code editor with support for development operations like debugging, task running, and version control• Combines the simplicity of a source code editor with powerful developer tooling• lightweight well-done editor, with few features but less complex• Simple and intuitive
	<ul style="list-style-type: none">• A web-based language that tells browser how to showcase text and images on a webpage.• Easy to learn• Every browser supports HTML language
	<ul style="list-style-type: none">• A style sheet language used for describing the presentation of a document written in a markup language such as HTML• Saves time - can write CSS once and then reuse the same sheet in multiple HTML pages• Easy maintenance - To make a global change, simply change the style, and all elements in all the web pages will be updated automatically.
	<ul style="list-style-type: none">• A scripting languages, primarily used on the Web• Simplicity - relatively simple to learn and implement• Interoperability - plays nicely with other languages and can be used in a huge variety of applications.

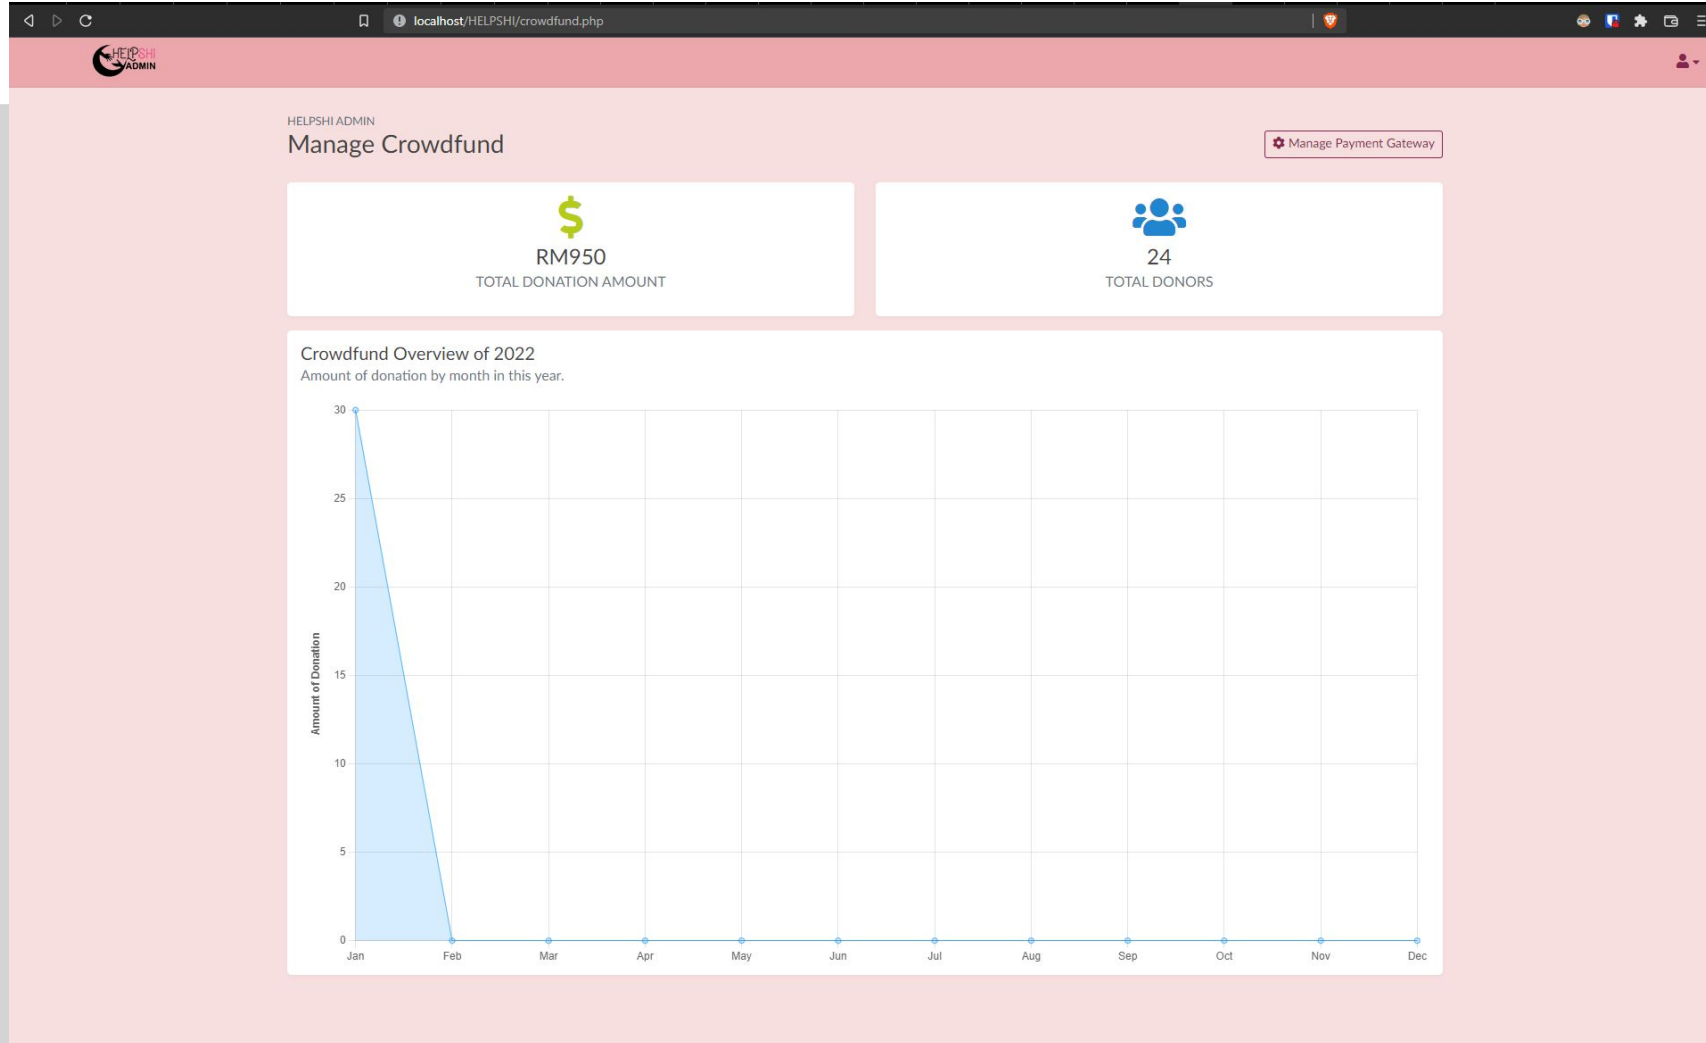

Introduction: Development Tools

Tool	Descriptions
	<ul style="list-style-type: none">• An open-source package of web solutions that includes Apache distribution for many servers and command-line executables along with modules such as Apache server, PHP and more.• Helps a local host or server to test its website and clients via computers and laptops before releasing it to the main server
	<ul style="list-style-type: none">• A general-purpose scripting language that can be used to develop dynamic and interactive websites• It's easy to learn and use• It's versatile• It is well connected with databases
	<ul style="list-style-type: none">• A database system used in web• An open source, reliable, compatible with all major hosting providers, cost-effective, and easy to manage
 Jira Software	<ul style="list-style-type: none">• Used for planning, tracking and releasing the software• Can accomplish the work in progress, generate reports, backlogs etc• Built-in roadmaps - Track progress of how projects are progressing so you can get a clear overview of your teams work and plans.

Backlog and Active Sprint by Aqilah Hanim

The screenshot displays a Jira issue page for the project 'HELPSHI System'. The issue title is 'View List of Donation' (HSS-11). The left sidebar shows a list of issues ordered by updated date, including HSS-11, HSS-18, HSS-9, and HSS-2. The main content area shows the issue description: 'As an admin, I want to view the list of donations so that I can monitor who donated to HELPSHI'. Below the description is an activity section with a comment input field and a 'Pro tip' message. The right sidebar shows the issue details, including the assignee 'Ahanim8', labels, sprint 'HSS Sprint 4', original estimate '0m', and time tracking status 'No time logged'.

Team Member 3: Nur Hidayah

The screenshot displays the HELPSHI Admin web application. A modal dialog titled "Generate Report" is open, asking the user to provide report date information. The dialog includes a "REPORT DATE:" section with "From" and "To" date pickers set to 12/01/2021 and 12/31/2021, respectively. An "Export" button is visible at the bottom of the dialog. In the background, the "Generate Report" page is visible, featuring tabs for "Donation" and "Contact", and a table of contact messages.

The screenshot shows a web browser at `localhost/helpshi/report.php`. The page has a dark header with a logo and a user profile icon. The main content area is titled 'Generate Report' and has two tabs: 'Donation' (active) and 'Contact'. Below the tabs is a table titled 'List of Donation' with columns: ID, Date, Donor, Email, Phone Number, and Amount (RM). The table contains 7 rows of donation data. A modal dialog titled 'Generate Report' is open in the center, asking the user to fill in report date information. The dialog has a close button (X) in the top right corner. Inside the dialog, it says 'Please fill in the information below.' followed by 'REPORT DATE:'. Below this, there are two date input fields labeled 'From' and 'To', both with a calendar icon. An 'Export' button is at the bottom left of the dialog. In the background, a 'Generate Report' button is visible on the right side of the table.
