BACHELOR OF COMPUTER SCIENCE

(GRAPHICS AND MULTIMEDIA SOFTWARE)

EXCEL MINI REPORT

CGMA INTERACTIVE DAY 2021

NAME: FATIN AIMI AYUNI BINTI AFFINDY

MATRIC NUMBER: A20EC0190

ACADEMIC ADVISOR: DR GOH EG SU

Program Justification

CGMA Interactive Day(CID) is an annual event held to welcome all first year student of Graphics and Multimedia Software programme to the university. This program is held to strengthen the bonding between the first year members as well as letting them know each other through all the group activities conducted during the event. During this annual event, kayak has became the compulsory acitivity that need to be included during CID every year. Eventhough CID'21 was held online, we do not exclude Kayak from the tentative because it is a tradition that must be kept every year. We found some alternative to include Kayak in the event which is to brief and teach them about Kayak by theory.

Graduate Attributes

1. Communication Skills
2. Leadership Skills
3. Thinking Skills

Program Tentative

Since this is an annual event held to strengthen the bonding between the first year student of Graphics and Multimedia Software, most of the activities were held in groups. It was all started with briefing from the head of facilitator, then they were asked to move to another platform which is Discord to discuss about the group activity as well as the task given which was to create poster and group logo. Two facilitators were assigned in each group to assist them to make the poster and logo as well as deciding which representative will play in the games that require representative to play. After the discussion, they played some activities which mostly were online games that can be played by many players. The participants needed to compete with each other to become the winner of the event. They were also very energetic to get involve with the games and activities. Eventhough the event was held online, everything went smoothly with the support from the participants themselves. Graduate attributes that is applied during the event are communication skills, leadership skills and thinking skills.
