Academic Advisor:

Dr. Ahmad Fadhil Bin Yusof

Prepared on: 20 June 2022

On 26th October 2021, a program entitled as “Meet & Greet with Data Experts” initiated by School of Computing specifically for data engineering students. Due to the pandemic circumstances, this session is conducted through an online platform which is on Cisco Webex. This means that all participants attended this program either at their home or anywhere else.

They had invited two speakers to share their experiences throughout their working life until that day. The two speakers are Mr. Looi Boon Hon, a data scientist at DHL Headquarters, and the second speaker is Miss Nur Adriana Norashid, an UTM’s alumni from data engineering course and a data analyst for ExxonMobil. The speakers have shared their takes on becoming a data scientist and data analyst to the students to inspire us to become better students. They also had shared some of their challenges that they need to face in their working life as well as willingly answer some of the questions from the audiences.
