

ExCEL Activity Report

CGMA BOXTROLLS 2022

Name: Tham Chuan Yew

Matrix Number: A20EC0166

Program: SECVH Computer Science (Graphic and Multimedia Software)

Batch: 2021/2022

Academic Advisor: Dr Suriati Binti Sadimon

Justification in joining the activities:

CGMA BoxTrolls 2022 is an activity held by Computer Graphics and Multimedia Association (CGMA) with the intent of having seniors share their internship experiences. This activity was held online via Google Meet on April 2nd, 2022. The main objective of this program was to enlighten students from year 1 to year 3 as they will eventually undergo their internships, and this program would give them some idea of what internship looks like.

Graduate Attributes:

1. Communication Skills:

Communication skill was encouraged in this event as there was a group activity and each member of a group needed to be involved. The activity that was given to us was to explain and propose a new idea for Industrial Revolution 5.0. I communicated with my group members to come up with an idea about how shopping would be revolutionised with the use of augmented reality.

2. Thinking Skills:

This program also helped to generate thinking skill. In order to come up with the idea mentioned above every group member had to brainstorm the best idea to try and win the group activity.

3. Leadership and Teamworking Skills:

Leadership and teamworking skills were also very relevant in this program. Our group leader was a 4th year student with plenty of experience in Boxtrolls activity. Our leader took the initiative to ask every member's opinion and then divided the tasks among us.

The contribution of all members allowed us to propose a solid idea and finished on time.

Content of the activities:

Boxtrolls 2022 began at 8.30 a.m for registration. Due to the pandemic, it was conducted online via Google Meet. After that, we witnessed the opening ceremony. At about 9.30 a.m., 4th year students began giving internship talks. Next, we were divided into breakout sessions to complete the group activity. After our lunch break, we had to present our idea to everyone. After every group has completed their presentation, we witnessed seniors answer questions which were given by students. Next comes the announcement of winner for the group activity and also the closing ceremony which included photo-taking session.
