Content of the activity

This talk was given by two speakers. This class was first introduced about the speakers then proceed to talk about sign language. They gave information about deaf and hard of hearing people. They also told the students how people can loss their hearing. Not only that, they informed that the most effective way to help deaf people hear is by using hearing aids. After Ms Suhaili finished giving out the important information, it was Mr Amril's turn to talk. He was the one who taught us about sign language. We learned on how to sign animals, alphabets, numbers, short speech like "Hello", "Thank you", those basic speech that could help us a bit in the future, and few others. Before the closing ceremony, we had a kahoot session. The kahoot quiz consists of 24 questions regarding signs. Those who participated need to join the kahoot session and guess which answer represents the sign. Then, after kahoot ended, they had a Q&A session for those who wanted to ask questions and the speakers will answer them.
