Course Name   : DATABASE ADMINISTRATION SECP3713
Title   : TASK 1 (WEEK 1)
Date   : 18th October 2022

Name   : MADINA SURAYA BINTI ZHARIN

Matric No.   : A20EC0203

Section   : 01

1. In 10 minutes, discuss with the student who sits next to you:

Refer to Chapter 1

1. How many DBA tasks are there?
    There are 7 DBA tasks.

2. From the DBA tasks, which in your opinion is the most important? Why?
    In my opinion, the most important DBA tasks is **Backup and Recovery**. This is to avoid errors and help the business recover from any unplanned event that might occur in the future.

3. In your opinion, from the lists of skills and knowledge for DBA to perform these tasks efficiently, which is the most important? Why?
    In my opinion, **Attention to Detail** is the most important skills because DBA should be aware to do data maintenance every day before stewarding the database. This helps to detect any potential problems before downtime. Other than that, this skill also helps DBA to always be prepared in handling any crisis that might arise.

2. Once the 10 minutes are up, we will discuss answers from the pairs.

3. After class, submit your answer on e-Learning as your first in-class activity.
