😜 Advanced Sequence diagram

STD

😜 Test case for sequence diagram

The Essential knowledge and skills that a leader must possess in order to ensure the success of a project?

○   ○   ○   ○

Are you ready?

Clear Vision

A leader should have a clear and compelling vision for the project because need to articulate the project's goals, objectives, and desired outcomes to the team members and stakeholders.

Communication

Strong communication skills are vital for a leader because as a leader need to communicate the project's vision, goals, and expectations clearly to the team members and stakeholders. Additionally, able to actively listen, provide feedback, resolve conflicts, and foster effective collaboration is good for a leader.

The **Key qualities** that an effective leader should possess to ensure the success of a project

○ ○ ○ ○

Are you ready?

Visionary
An effective leader has a clear vision for the project and can communicate it to the team members because can inspire others with their vision, providing direction and purpose.

Integrity
As a leader with integrity build trust and credibility among team members and stakeholders. so that can demonstrate ethical behavior, honesty, and consistency in their actions and decisions.

Confidence
Confidence is key for a leader. It instills trust in team members and stakeholders, inspiring we all to believe in the project's success and their own abilities.

Thank you! ○ ○ ○ ○

Have a great day ahead.
