## Justification for Joining the Activity

The seminar event International Talks has outstanding speakers who will each cover a distinct subtopic related to education, economics, or social humanity. From 8<sup>th</sup> to 10<sup>th</sup> October 2021, International Student Society (ISS) Indonesia hosted this online event. This program intends to serve as a resource for all international students interested in learning about sustainable living technology and serving as a resource for all international students interested in learning about sustainable living technology.

As I am the string committee for this event, I was able to supervise all the committee's progress. I didn't do much on the operations side, but I was able to guide the committee when they needed help. This helped the committee to move more fluently for the completion of the event.

### **The Graduate Attribute(s)**

Communication Skills – I am unable to avoid holding meetings and in-depth discussions until I am certain of the time because I am on the string committee. This event has a very intricate plan that must be carried out with a minimum number of individuals. Therefore, it is crucial to have strong communication skills, which I developed through interacting with committee friends. In the end, I have developed my ability to fully communicate effectively.

**Self-Reflection**

In the end of this event, I have realized that my role in this had a major impact, because I am basically in charge of double checking all the work that the committee members have done. I didn't know that supervising was going to be this difficult. I now admire more about the supervisors that hold the group together. I strive to be like a role model in future projects and/or events.
