

Industrial Training Presentation

Industrial Training at B2BE GSS Sdn Bhd

Presented By: Tan Jiau Ting A21EC0135
Faculty Supervisor: Dr Md. Sah Bin Hj. Salam
Organization Supervisor: Teong Shiau Hui

Overview

01 ORGANIZATION BACKGROUND

02 PROJECTS INVOLVEMENT

03 WHAT HAVE LEARNED?

04 CONCLUSION

B2BE GSS SDN BHD

Founded in Australia in 1998, B2BE has grown significantly and now operates globally, including in the Asia-Pacific, Europe, and the Americas.

Provide innovative e-commerce solutions for businesses.

B2BE, short for Business-to-Business E-Solutions

Vision

To be a global leader in providing innovative business-to-business e-solutions, helping organizations streamline their operations and achieve greater efficiency through automation and technology.

Mision

Simplify and automate key business processes, enhancing efficiency and reducing costs for its clients.

B2BE Services

- Document Management
- Order to Cash (O2C)
- Supply Chain Finance
- Procure to Pay (P2P)
- Visibility Tools

PROJECTS INVOLVEMENT

Transaction Delivery Network (TDN)

Provides the infrastructure and environment needed for clients to securely transmit documents and data between their backend business systems without any human intervention.

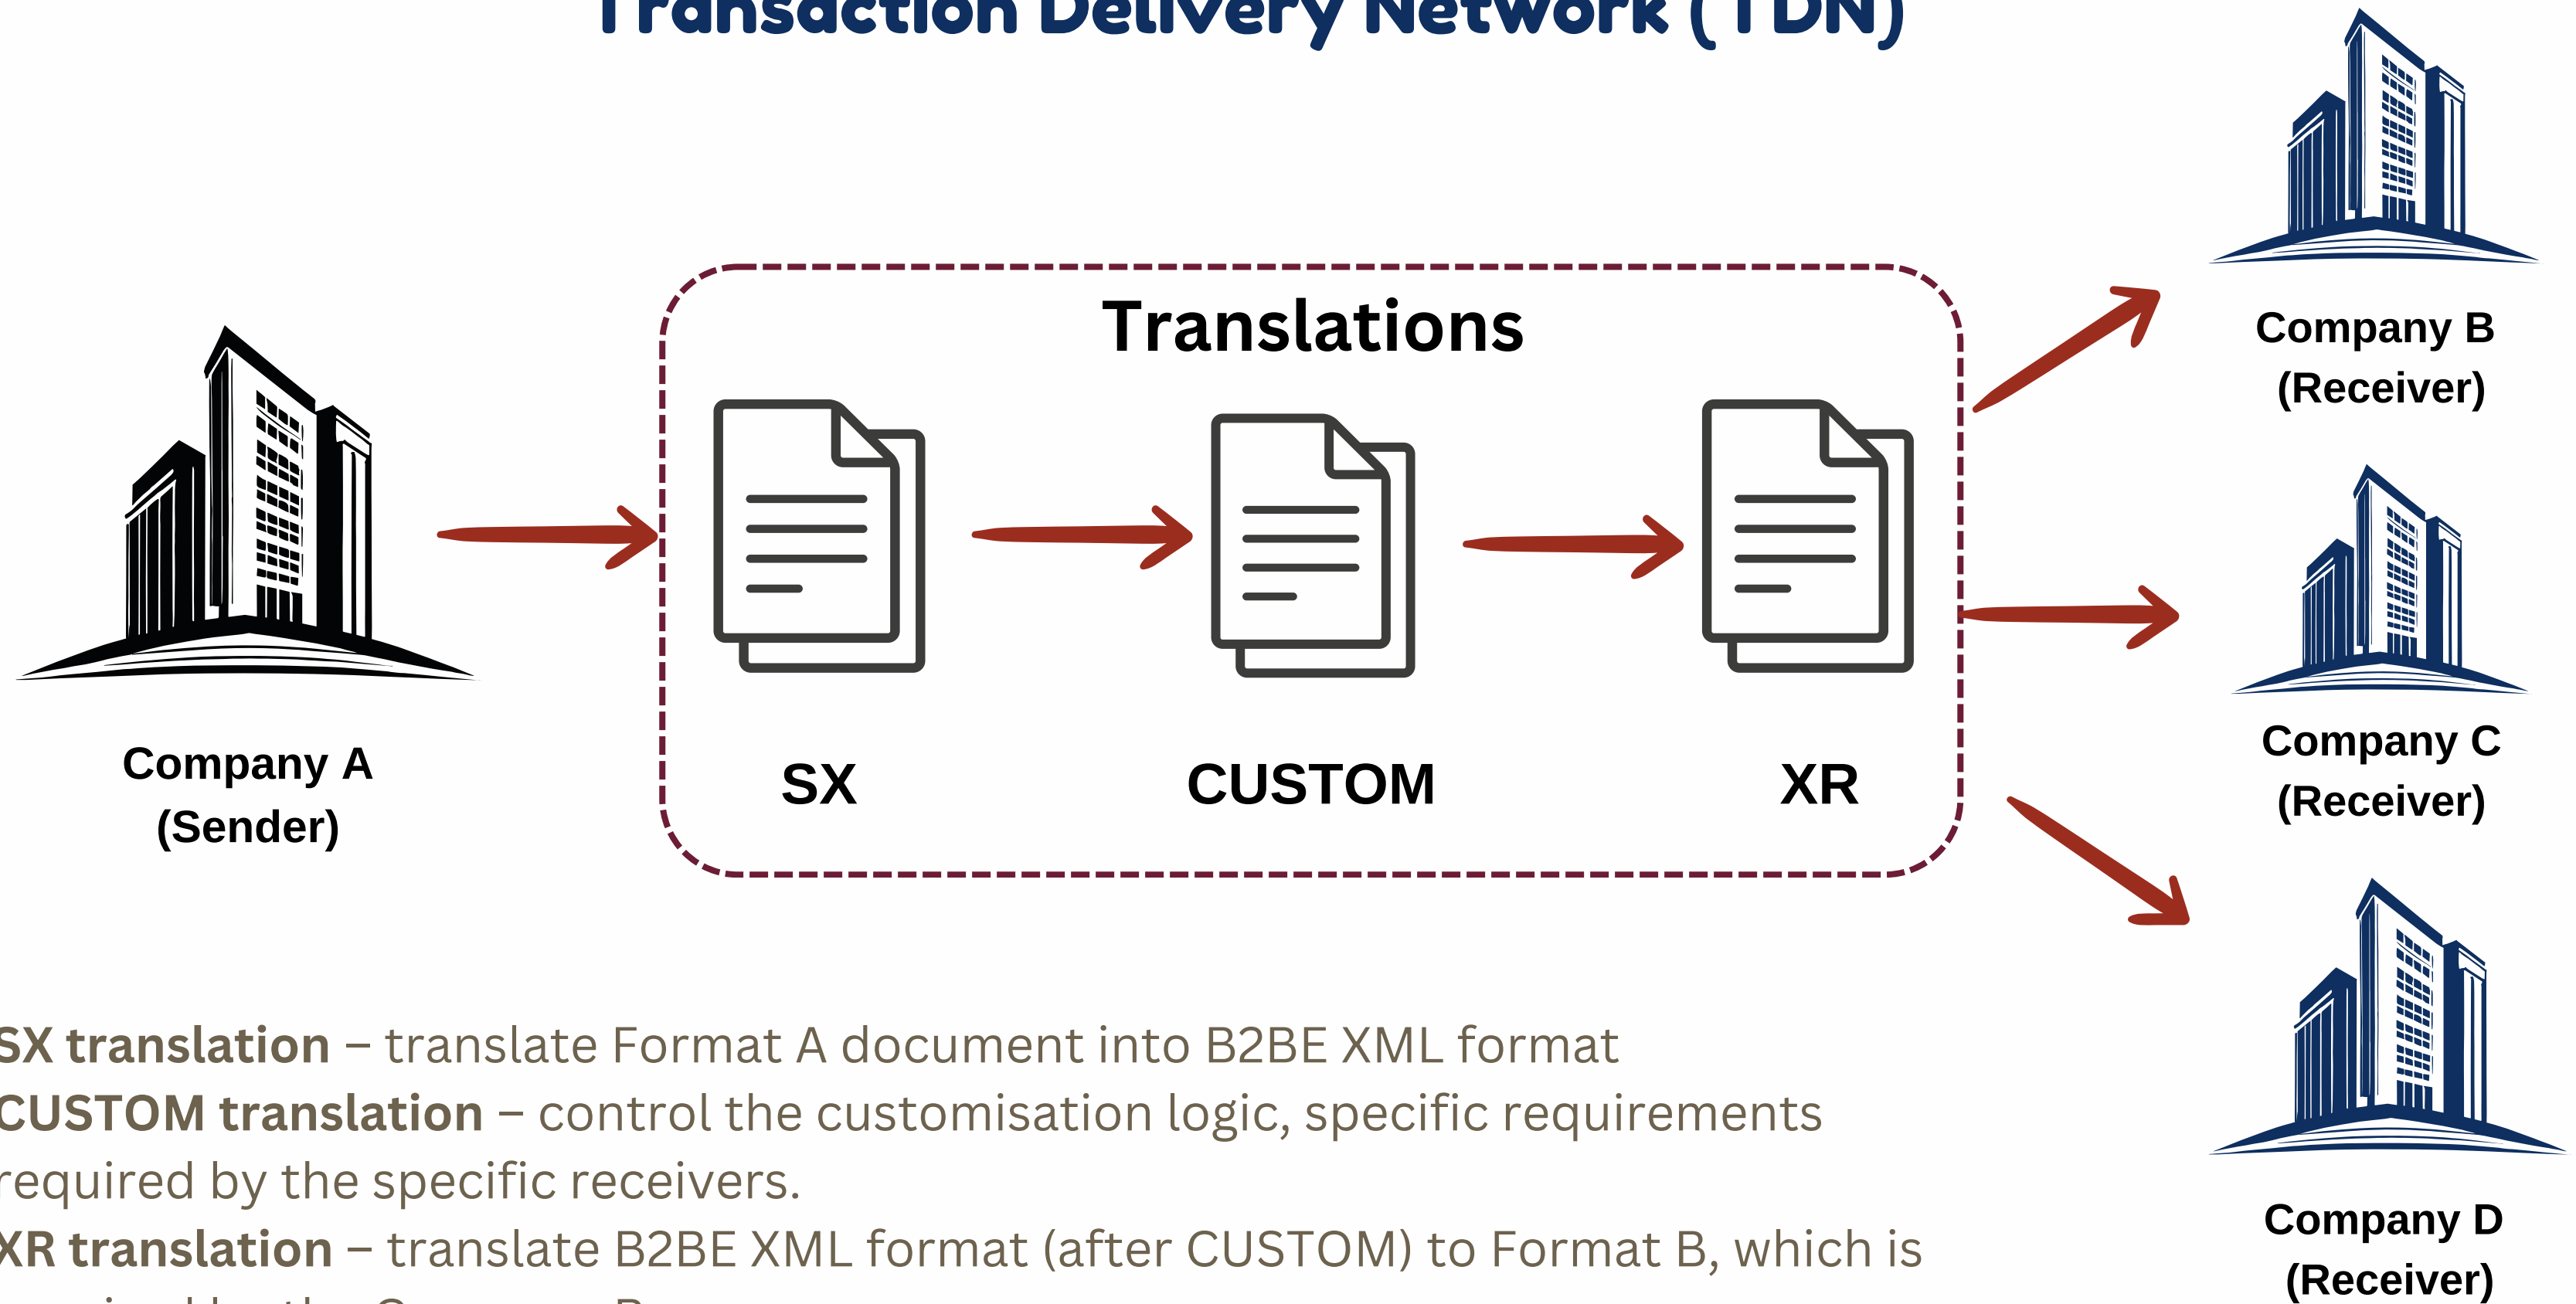

V2 Migration Project

Migrating translations from the old Mel02 server to the new MapAU server. The migration is because of the capacity limitations of the Mel02 server.

Katalon Maplemin Testing Project

Katalon Testing for the Maplemin Web App, which was part of B2BE's ongoing project for automated testing.

Transaction Delivery Network (TDN)

V2 Migration Project Tasks

V2 Migration

V2 Migration involves in update the translation code using the C++ programming languages.

Remove Pending Changes for Projects Completed and Aborted

Revert pending changes to the previous version for translations.

Check and Disable the Relationships

Check inactive relationships with no translations and disable them accordingly to clear the unused relationship.

V2 Migration Project Tasks

Monitoring Tranlations/Relationship in UAT and Live Environment

This monitoring ensured that the translations performed as expected and met quality standards post-export.

Swapping Relationships

Test relationships before swapping from Mel02 to MapAU to ensure accuracy.

Uncheck Translation

Uncheck the translations in Mel02, to ensure transaltion in MapAU .

KATALON MAPLEMIN TESTING PROJECT

Create the test cases and test run for Maplemin web

To create test cases and write a test script for automating tests on the Maplemin web app

User Manual for Maplemin

Write a user manual for Maplemin covering feature guides and usage instructions.

What have I Learned?

Hard Skills

- Improved programming skills in C++ and Groovy
- Developed problem-solving abilities to troubleshoot and resolve technical issues.
- Worked with Katalon for test automation.
- Gained expertise in SQL.

Soft Skills

- Communication Skill
- Teamwork
- Time management
- Adaptability

CONCLUSION

Industrial training provides a valuable opportunity to gain hands-on experience and improve professional skills like communication, teamwork, and problem-solving. It allows me to apply classroom theories to real-world tasks, deepening my understanding of their relevance. This experience also exposes me to various aspects of the industry, helping me explore career options and enhancing my chances of securing a job with my desired company after graduation.
