# INTERNSHIP PRESENTATION

Name: Haris Izudin Bin Hairul Azhar

Matric Num: A21EC0029

Faculty SV: Ts. Dr. Maheyzah Binti Sirat @ Md Siraj

Organization SV: Muhammad Rasyid Redha bin  
Mohd Tahir

*Innovating Solutions*

# Introduction

About CyberSecurity

Malaysia

# Corporate Overview

CyberSecurity Malaysia, under the Ministry of Digital, enhances national cybersecurity through innovation-led services, reducing digital vulnerabilities and strengthening self-reliance. Its key services include:

- Cyber Security Responsive Services
- Cyber Security Proactive Services
- Outreach and Capacity Building Strategic
- Study and Engagement Industry and Research Development

# Vision, Mission and Strategic Theme

## Vision

World-class  
cybersecurity specialist  
agency.

## Mission

Leading the development of a safer and more resilient cyber ecosystem to enhance national security, economic prosperity, and social harmony through

- Provision of quality and impactful services.
- Frontier-expanding cyber knowledge and technical supremacy.
- Continuous nurturing of talent and expertise.

## Strategic Theme

- Partner in Driving National Agenda.
- Quality & Impactful Service/Projects.
- Integrated Development & Delivery.
- Technical Excellence & Capacity Enhancement.
- Financial Sustainability.

# Digital Forensics Department Services

## Xforensik tools

**PenDua** : Forensic-grade portable file duplicator

**Kloner** : Forensic tool for cloning, imaging, and wiping

**DataHapus** : high-powered and user-friendly data sanitization device

## camMuka 2.0

CamMuka is a forensically sound facial recognition system for criminal investigations, delivering court-admissible results. Powered by AI and backed by scientific research, it follows SOPs and international digital forensic standards.

## Digital Forensics Quality Management System Expert Consultation

Digital Forensics QMS Expert Consultation helps labs develop ISO 17025-compliant policies, ensuring skilled staff, controlled environments, and court-admissible forensic results.

CyberDiscovery is a service offered to individual and private organization. It addresses concern on Electronic Stored Information (ESI) in order to provide solution to civil litigation. It includes the following services:

- Onsite Digital Evidence Preservation
- Digital Evidence Analysis
- Expert Witness

# Internship projects

# Internship Projects

**Token Creation**

**Cryptocurrency Mining**

**Transaction Analysis  
Using Etherscan**

**Capture The Flag  
Challenge**

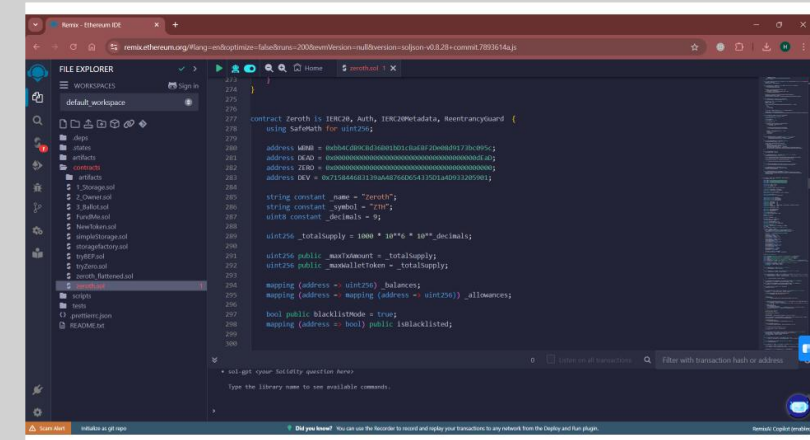

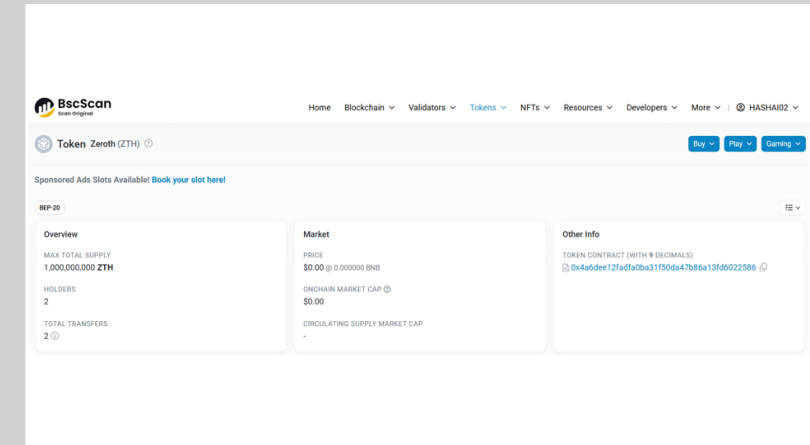

## Token Creation

- Developed a **BEP-20 token** using OpenZeppelin's standard for compliance and security.
- Leveraged **Binance Smart Chain (BSC)** for lower gas fees and cost-effective development.
- Ensured adherence to **blockchain security standards** for reliable functionality.
- Used the token to **simulate fraud scenarios** for research on blockchain ecosystems.

## Implementation

## Token Creation

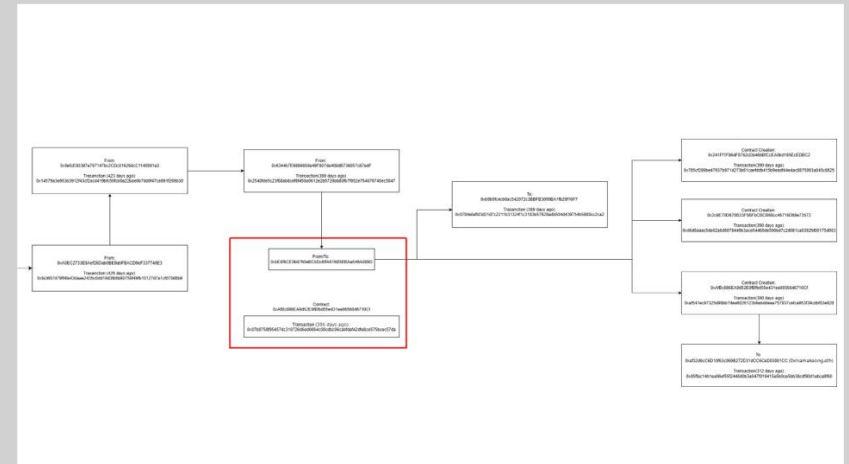

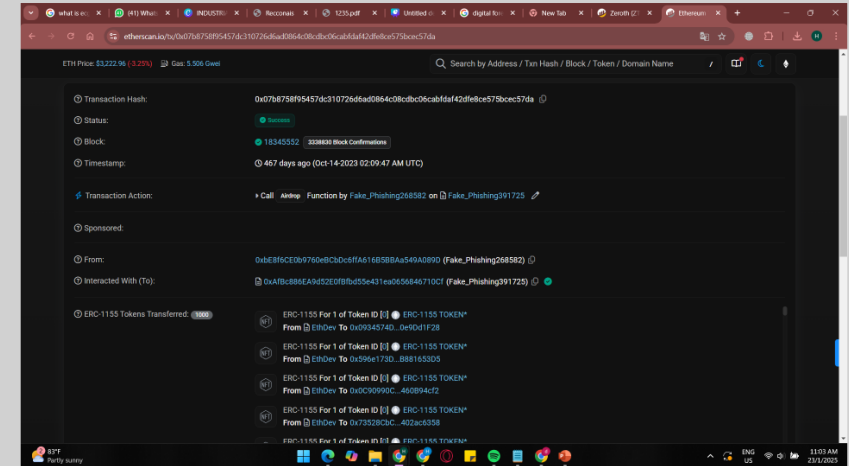

## Transaction Analysis Using Etherscan

- **Investigated phishing transactions** using **Etherscan** to analyze fraudulent blockchain activities.
- **Traced and identified fraud patterns**, visualizing illicit transaction flows with Draw.io.
- **Researched blockchain fraud** and phishing strategies from reliable sources like forums, articles, and cybersecurity discussio

## Implementation

## Token Creation

## Transaction Analysis Using Etherscan

## Cryptocurrency Mining

- Assigned to **cryptocurrency mining** on a specialized machine with six AMD RX470 GPUs.
- Conducted extensive research to select the most profitable **coin to mine**.
- Used **hashrate.no** to analyze mining profitability, device compatibility, and market trends.
- Evaluated hash rate, energy usage, and market movements to optimize mining selection

## Implementation

## Token Creation

## Transaction Analysis Using Etherscan

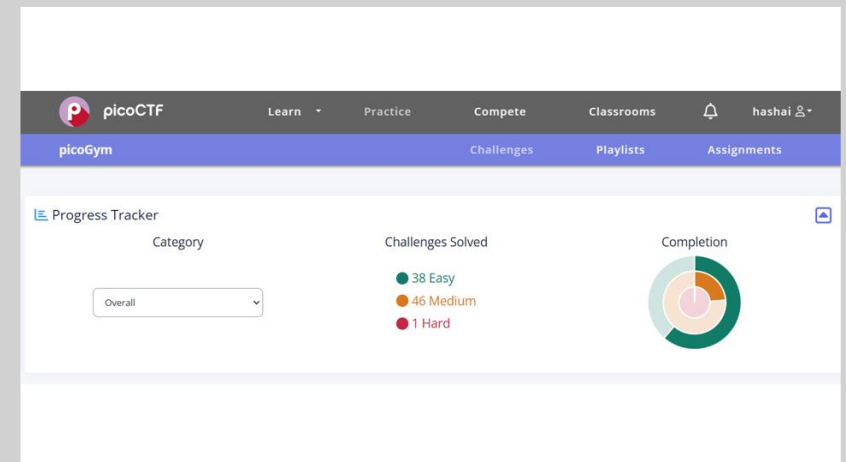

## Cryptocurrency Mining

## Capture The Flag Challenge

- **Led a team of interns** through Capture The Flag (CTF) challenges to enhance cybersecurity skills.
- Guided the team on platforms like **TryHackMe, PicoCTF, and Hack The Box (HTB)**.
- Organized **daily one-hour sessions** to foster collaboration and knowledge sharing.

## Implementation

# **Experience & Knowledge Gained from Internship**

01

### Blockchain & Smart Contracts

Developed **BEP-20 token**, debugged **Solidity**, and ensured compliance.

### Blockchain Analysis

Investigated phishing scams using **Etherscan**, visualized fraud patterns.

02

03

### Cryptocurrency Mining

Configured **mining rigs**, optimized performance using **Hashrate.no**.

### CTF Challenges

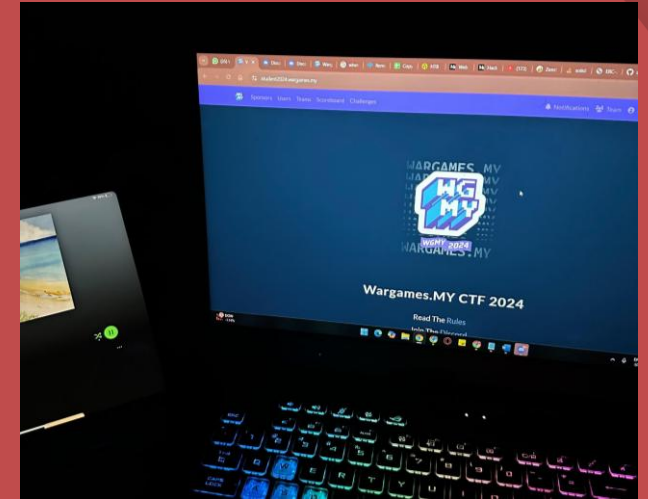

Led a team on **TryHackMe**, **PicoCTF**, **HTB**, using **Kali Linux**, **Burp Suite**, **Metasploit**.

04
