1.0 AIM

This proposal is purposely to get the approval of conducting a workshop titled “Drug Education and Prevention” that will be held by our group that consists of 7 members and will focus on the teenagers that have the high risks of involving with drugs. This program is also to complete our task for the UHAK1012.

2.0 BACKGROUND

2.1 With the increasing concern and concern of the community about the problem of drug like a narcotics, psychotropic and addictive substances the public expects attention and concrete and decisive action from the government to overcome the problem, and the government also expects the active role of the community to jointly tackle the problem .

2.2 The problem of drug abuse, is a problem that must be a concern of the public and government in general, and in the field of medicine in particular, especially those concerning psychiatric problems. The severity of drug use is common among students.

2.3 The lack of knowledge as well as a deeper understanding of the dangers of drugs is still not fully realized by students. Even though drug eradication efforts have been intensified and public complaints and concerns about drug use that have become global, but still many students to underage children fall prey to the supervision of the surrounding community. Therefore, through this research proposal, we hope that the readers and the entire community, especially students, will be more vigilant and care for the common good for the improvement of the nation and a bright future.

3.0 OBJECTIVES

3.1 Our main objectives of this program is to plan, implement, lead the program, collaborate and take an active role within the group members. This is important for us in order to improve our soft skills. We also want to give exposure and awareness about the types of drugs that are often misused and not really known by the public o the students so that they can take more precautions to avoid from it.

3.2 Other than that, this program also purposely to open the teens' mind and heart about the dangers of drugs towards themselves, families and the society. In conjunction with that, this program will give explanation about the drug abuse laws in Malaysia. Lastly, all of us will gain more knowledge on how to deal with drug addiction at the end of the day.
