Thinking Skills - Students' Reflection (Individual)
UHMT1012 GRADUATE SUCCESS ATTRIBUTES
SEMESTER I, SESSION 2019/2020

Lecturer/Instructor: Dr. Muhamad Afzamiman bin Aripin

Name: SEE WEN XIANG

Matric Card No.: A19EC0206

Programme: BACHELOR OF COMPUTER SCIENCE (SOFTWARE ENGINEERING)

Section: 27

Week 1:

Before I coming the class, I feel full of curious about this subject. Fortunately, this subject's course information doesn't let me disappointed after lecturer let us know the course information of this subject. As we can learn seven attributes after we taking this subject which are useful in our future life.

Week 2:

We need to get more experiences to improve those attributes in our daily life. After the class, we know that we need to improve our written skill, time management skill, and so on to let our employability skill become stronger. In term of scholarship skill, we learn that we should be proactive in group work which will help you survive in this society.

Week 3:

Everything has both sides; we should use our wisdom to differentiate the correct and incorrect information before we transfer to others. From the activity conducted in class by students, we can really experience that how important of effective communication skill in our daily life.

Week 4:

Everyone has responsibility to be a global citizen. This world, this earth is belonging to us, we should anything in this world with others. Actually, we should learn together, caring each other, then everyone can success together to make our world more beautiful and peaceful.

Week 5:

Adaptability is one of the important attributes in our daily life. We should always be aware what situation we are in. If we live without adaptability skill, we maybe will make our life become bad situation. If the situation is more serious maybe your family and friend around you also will be inside a bad situation also.

Week 6:

Bloom taxonomy is the word which I first time heard in this week class. From this week class, I know that level of thinking skills is separated by pyramid level. We should always think before we start to action. Besides that, we should always aim for the top 3 level thinking skill which will stimulate our brain to make new point of view or improve critical thinking.
