 4. If they are lucky enough, from both of two cup, there will be a paper written amount of money on it.
 5. The group that collect the highest total amount of money will be a winner.

Expected outcome & Reflection :

For all the activities, we expect that each member of the group can achieve the objective. Which is to be a creative and innovative person, confident, optimistic and also risk taker along with can tolerate with failure. This characteristic are very important in our life even though we do not want to be an entrepreneur because they are natural things that should have in each person to be a better and successful in whatever we are doing in future.
