

EXHIBITION INNOVATE JOHOR 2019

1-3 OCTOBER 2019
DEWAN SULTAN ISKANDAR

This exhibition is about to celebrated the diversity of research information within Johor. Especially those that are from UTM itselfs. Besides, this exhibition is about to Innovate Johor to become the most successsed states. There's a lot of booth with their projet.

There is a few booth that caught our attention.

The first booth is Carbon footprint calculator for Malay Green highway Index. The vision of this project is to minimize the impact, issues realted to highway development. The mission is about to promoted the use of automated Green Highway asessment in the country. Othert than that, they wanted Calculate the carbon relased in the highway.

The second booth is Ammonia Remover. They use a bio-material catalyst to remove an ammonia in lake. Its so reusable because catalyst do not dissolve in water. The most importance is its a Eco friendly.
