- Public Speaking.

Creativity

- Creativity: Fluency, Flexibility and Originality.
- Those who are creative seem to be a man/woman with bright future.
- Creativity requires production of fresh ideas and are applicable ones.
- Engineering design process involves creativity.

Activity: Designing a Paper Plane

- Design a paper plane that you think is the best in design.
- You can create a maximum of three paper planes.
- However, choose one that you think is the best.
- A competition will be made for all students.
- A winner is determined by: (1) the longest distance of the plane (2) upright motion, not inverted.

Reflection

What have you learned from this activity?
