### **Web-Based Project Write-Up**

During this Movement Control Order (MCO) period due to the spread of pandemic COVID-19, we are advised to stay at home and practice social distancing during this partial lockdown. Throughout this period, I get the opportunity to experience and do many activities at home. Usually, I will prepare for my online classes and finish my assignments. As we know, now the university acquired all of the students to accomplish the semester throughout online assessments. Therefore, most of the time I will prepare the materials and do some further reading to complete my assignments and projects. Apart from that, I get to spend more quality time and strengthen the bonds with my loved ones. During this MCO, I always help my family with the house chores. Normally, in the afternoon I will help my mother to tidy up the house and help her to prepare the foods for lunch and dinner. Also, sometimes I will help my father to wash his car in the evening. Plus, during this quarantine time, I play online games and watch movies to have some entertainment and pass the time. During my free time, I will do some home workouts while listening to my favourite music.
