## EXECUTIVE SUMMARY

Fourth Industrial Revolution (IR 4.0) is the continuing automation of traditional manufacturing and industrial practices based on the Cyber-physical System by using modern smart technology. The growth of IR 4.0 has introduced many new work opportunities as well as improved productivity and increased profitability. Telekom Malaysia Berhad (TM) also contribute in the journey moving towards IR 4.0 by enabling Digital Malaysia.

## INTRODUCTION

In our present time, where is the industrial revolution evolving from being just an industry that anyone can be professional on by only practicing and training in the traditional and non-practical ways to an advanced industry with a purely technological and technical focus, where everyone needs technical know-how. As we all know that the Industrial Revolution is now far more digitalized and practical than before. It is important to mention that the industrial development of any country has become linked to the extent of its technological and electronic progress, which undoubtedly has become a measure by which countries are measured in terms of advanced or late.

## ENABLING DIGITAL MALAYSIA POWERED BY TM

### DIGITAL GOVERNMENT

SMART CITY   
 SECURITY   
 CCTV  
 SMART TRAFFIC LIGHT   
 SMART WATER SYSTEM   
 ICT/BPO DATA ANALYSIS

### DIGITAL ECONOMY

SMART BUILDING   
 DRONE   
 DIGITAL PAYMENT  
 SMART FARMING   
 DC/CLOUD   
 DATA ANALYTIC

### DIGITAL SOCIETY

SMART HOME   
 5G   
 ECO GREEN TECHNOLOGY  
 SOLAR SYSTEM   
 APPS   
 ELECTRIC CAR

## REFLECTION

The motivation that we gained from the industrial talk is that for the betterment of the world and the humans, we must work on new innovations. We should never stop giving efforts. Because all the great innovations were not appreciated in the first place. After many unsuccessful attempts, they could bring revolutionary change in the world with their innovation.

## OPINIONS AND VIEWS

We believe that the industrial revolution did not start by itself but on the contrary, there was a great motive and tendency for humans to change the concept of traditional industrial to the modern one. As our world and planet going and changing rapidly we need and we have to keep pace with this change by developing our industrial traditional methods to the modern methods, specifically (AI) technology, Environmentally friendly technologies, And modern industries that guarantee sustainable development as well as human prosperity.
