- Smart Helmet
- Geolocation Safety App
- UNESCO 8K virtual Reality

We are very happy because this talk gave us a great opportunity to know more about industry 4.0. We can see that industry 4.0 provides a wide range of functions to ease our life in education, workspace, business and others. It really interest us to step into the fields that can help in the development of the industry. We hope that Telekom Malaysia can widen the coverage of 5G in every states in Malaysia soon. So that, more people can get benefits from it.
