Tan Yong Keong Abdullah Faisal Alhujaili Singapore – Tan Yong Keong is a fresh undergraduate who did his degree in software engineering. He currently works as a Data Science Engineer at Micron Semiconductor, Singapore. He also a Chancellor Award receiver during his time in UTM.	Batrisyia Qistina Muhammad Syahir Johor Bahru – For the next speaker in this talk is Batrisyia Qistina Binti Azman Shah, she graduated on June 2020 in Degree of Data Engineering at Universiti Teknologi Malaysia (UTM).	Mohamad Zamarul Nur Syakirah UTM skudai - 29December 2020, UTM School of Computing was organize Alumni sharing session. They are discussing about “Inspiring Work Experience and Covid19 Pandemic challenge”. There are 5 speakers including the lecturer, Dr Johanna but one person was absent. One of the speaker is Mohamad Zamarul Akmal bin Mohd Hussin.
 Tan Yong Keong		
He loved to participate in many competitions such as hackathons and was able to develop his professionalism as well as his presentation skills. He also did freelance as a part time job and was able to develop his technical skills during his time as a freelancer. He mentioned that employers will note our technical skills when students apply for software engineering position in the company. In a nutshell, he encouraged the students to practice their coding skills to boost	Currently, she is working at TM One as a Social Media Data Analyst. She has a year of working experience including her internship period. At the beginning of this talk, she shared her experience on how she got promotion to be the permanent staff during this pandemic. During her internship, she showed effort in his involvement managing many projects in his workplace. From there, her supervisor which is	He was graduated on June 2020 in degree of Data Engineering(Computer Science) at Universiti Teknologi Malaysia. Now, he work as data engineer in PPG Coatings(M) sdn bhd. The company he work now in same place when internship before this. He get as permanent staff because of he being proactive during the intern. During intern, he propose the new idea that give big impact to

their confidence level and also participate in a lot of competitions to get to know the real world problems.	her manager saw his interest and seriousness in project involvement and then he wanted her to join TM One as a permanent staff to further the company's project. In the project, she gathered all social media data and she interpret it into a dashboard. For her client management, she used their brand information to make a marketing.	his company which is he propose to create monitoring dashboard for monitoring the big data to hold. He also told that being proactive is very important to make sure that we build ourself to be better in future. There are few tips that Zamarul shared. The first tip is, we need to learn technical skill during our study. It helps us to manage things in future for example during our internship or in our job soon to finish up any projects. We can get technical skills by participate any club or society during our study. Beside that, not just only the fundamental need to learn. Currently we facing the Covid19 which are cannot go anywhere, so that take this benefit to take online courses such as EDEX and many more which are can get the courses free. Trainee program such as learn data structure also can help us too. We also need to improve our softskill. This is important part in career life. We can build good communication skill with the team and also teamwork skill. Try to blend with the team and be easy going with others. Zamarul also share that how to gain confidence skill. He said that he gain to be confident person by joining a lot of program during study. He also try to volunteer in every task such as in presentation session during the class. He told that he very enjoy in university life because we still have free time life also, we still can make mistake and learn but in career if we make one mistake it will effect future career and also difficult to get the job because the mistake that we have done.
