Acknowledgment

I would like to express my deepest appreciation to all those who provided and organized us the possibility to attend this sort of useful industrial talk 2. A special gratitude I give to our dear Dr. GOH for regulated the event whose contribution in stimulating our information and education, Furthermore I would also like to acknowledge with much appreciation the crucial role in the workshop the talker in our event Mr. Khairul who shared and helped us to coordinate our information in IT Project Management especially in field that will help us in the future.

Abstract

Although the information technology project management has been a topic of concern in recent years, our simple report is about **Industrial talk 2** in the faculty of computing UTM provided and moderated by our **Dr. Goh** and it has given by **Mr. Khairul** the subject of the talk was information technology project management. Here we will discuss the importance of IT project management in our daily lives, the trends of IT project management, the relative careers in IT, and at the end we will give our own reflection.

I. INTRODUCTION

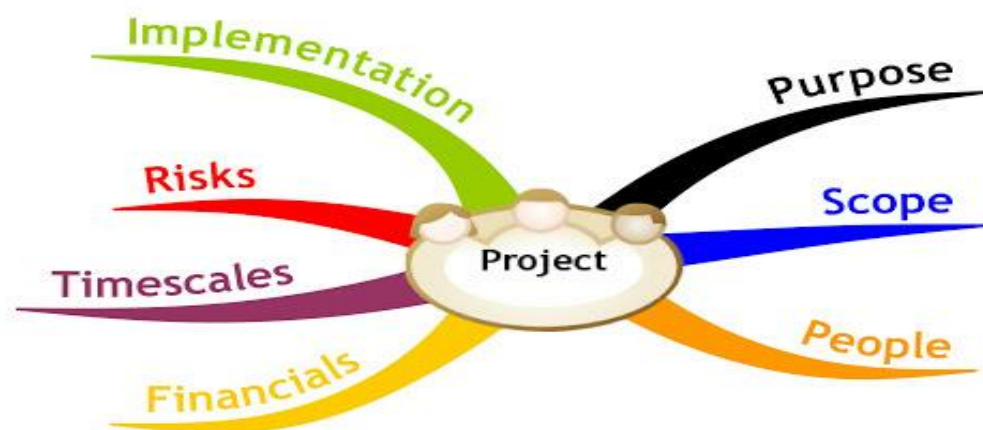

On Tuesday on 1 December 2020 from 10:00 AM to 11:00 AM we had such an amazing workshop conducted by **Mr. Mohd Khairul Reeze Ruslan** about the importance and trends of IT project management and how it sought best communicates among the full implications of the project. In particular, the necessity of understanding “how to manage our IT project” in contrast to knowing the scientific fundamentals is developed as a basis for IT management. The first part of the talk we got some information about Mr. Khairul who is an expert in IT project management. **Mr. Khairul** was graduated from **UM** with Bachelor of Computer Science in 2003, after that he completed his masters from **University of South Wales, UK**, and he also have a lot of work experience and professional certificates. Mr. Khairul worked in several companies, mostly banks and currently he is working with the **Malaysian government** on **ePerolehan** Project. The industrial talk 2

II. Importance of IT project management

We can understand from this workshop the importance of IT project management to the industry and technical community still need to improve and be well established. The fundamental implications of technology management for the engineering profession is explored.

A. The Importance of IT project management

To begin with, project it can clearly saying is a “one-off” scope of work frame that’s known by time, financial, and quality. Any project has its set of characteristics which they are

However, project management or on other hand can be known as extend administration is the application of information and knowledge, skills, aptitudes, apparatus, and procedures to venture exercises to meet the extend requirements.

By overseeing a project, you increment your chance of succeeding since once you oversee a venture you begin having clear destinations, you begin arranging and controlling the time quality, hazard, and fetched. Which can make the advantage higher.

B. Trending of IT Project Management

Right now, the IT project management is moving towards a Globalized Gig Economy, though representatives are utilized for short-term or as consultants rather than changeless occupations. Also, currently the drift is going towards more advanced and farther groups. The center is right now on Robotization and AI and Enormous Information areas. Mr. Khairul too highlighted the significance of having adaptability and altering to modern patterns and changes. He said moreover that you just ought to continuously attempt to combine distinctive working techniques. He moreover specified how imperative it is to utilize the assistance of tools and arrangements to arrange, communicate, and track progress. At last, he said that everybody has got to progress his Enthusiastic Insights (EQ) since as he said IQ can get you hired but EQ gets you advanced. He too said that EQ is the one that’s reaching to decide whether you’re getting to be fruitful or not.

III. Relevant IT careers

Here regarding to an organization that help graduated people to get a job in Malaysia which called a JOB STREET according to it last report there was an increase of 40% searches for IT-related roles which include IT project managers¹.

The average salary for an IT project manager in Malaysia is 9600 MYR however there is a huge difference between the highest and lowest value.

IV. Reflections

HASED

1. My goal is to make a difference in the field of technology, being such a good programmer, make a massive development in future technology. Make a magnificent effect on the environment around me and I would like to change the world for goodness sake if I could and it doesn't matter how hard it will be.
2. As I listened to the host of our event Mr, Khairul and the amount of goals he has achieved. It shows me how human can go and it encourage me to never give up and I will keep learn and improving myself as long as I have the believes in my ability . also I have learnt how to manage project in field of IT project management
3. At this stage of my life I need to be more knowledgeable and much wiser ,well educated that well lead me to lead the world one day and make a difference in the reality
