

# PRESENTAION OF FUTURE

Introduction:The industrial revolution evolving in industry,so that anyone can be professional by practicing in the nomal way.

Opinions:I believe that the industry revolution will start on the contrary,thus a good motive for human beings to change the old industrial to a modern one .

## REFLECTION

The information that we learned from the industry talk is that for the better future of human beings we must work on new innovations.We should stop making efforts.Because the good innovation is not appreciated in the first place.
