MD ROKNUZZAMAN RASEL (A19EC4051):

(a) What is your goal/dream with regard to your course/program?

: As a software engineer student, I have dozens of several approaches where I can go in and there are various goals which I want to achieve. That is why it can sometimes be difficult task for software engineer to craft adequate goal. Though I have multiple goals regarding my course, I want to be a successful entrepreneur. Because I want to have my own business and I do not work for other people to help their goals come true. In this regard I become a small part of an astonishing team building one of the world's great products where I can work on a great team continuing to create a world changing product like You Tube or Google. This means working on a big company, getting utmost ownership over what I am doing. Whereas my course about software engineering, I look forward to becoming better at this software engineering course and learn more about software process. By completing my course, I will affix myself into a successful company in which I can build something completely of my own design.

(b) How does this talk impact on your goal/dream with regard to your program?

: To become a entrepreneur, it is necessary to know myself about the trending of project management. Because project management is a field which engages through all industries in all country.
These days, Information
Technology has great involvement on the part of the project management. During the past, Information Technologies were only part of the enterprise infrastructure. But at present, Information Technology impacts the business environment to which it is Instituted, and it makes the management more effective and efficient.
In this industrial talk I have learned several things about IT project management which are:
1.This talk increases my project management skills.
2.how to communicate clearly with customers and team members what needs to be done.
3.how I Identify and manage the risks about my goal.
4.how I can identify what needs to be done and execute smoothly on that plan.
5.How I can accept changes and stay flexible towards my goal.
6.how I can manage my emotion when I am getting angry or depressed.
So, I can say, this industrial talk taught me these above things about the importance and trending of IT project management which impacts on my goal.

(c) What is the action/improvement/plan necessary for you to improve your potential in the industry?

: A good action plan can make easier for us to track the goal and also breaks up the process into actionable assignment based on a timeline. Whether I have a business, career, or any personal goal, a well design action plan can create a obvious path to success. Several actions are necessary for me to improve my potential in the industry, but I want to improve my focus towards goal. Because we are living in a fast-paced world where we can get distracted easily by lots of things. That's why I think the best way to reach your milestone is focus on doing my Daily habits.
Here are the same reasons why focus is important for goal:
1.It helps us to make a better life.
2.It provides us to discover more opportunity.
3.It will help us to enlarge your skill and knowledge.
4.It will help us to bring attention towards a particular task.
5.It will determine the level of success you achieve.
For these above reasons, I want to improve my potential in the industry.
