

As I started this semester back in October, 2020 I wasn't quite excited for the UHLB1112 English course. I thought it to be a regular course with loads of assignments. But now at the end of the semester, it turns out that I was wrong.

Since English is an International language, it plays an inevitable role in everyone's life and to interact with foreign people English is a must. To make sure everyone has a good command and face no obstacle in the long run UTM made the English course mandatory for every individual which mainly aims to the development and advancement of English communication skills of each and every student.

Unlike other courses the English course was actually a real interesting one thanks to the creative assignments and projects. Starting from video project to quizzes, reading, listening and speaking test in Headway all the assignments made me learn different new things. Because of the video project I learned video editing and a little bit of cinematography which actually turned out to be a life saver for me in many other courses.

Throughout the course I myself didn't face quite much of a trouble remembering the deadlines as our lecturer Ms Nurhazwani kept on reminding us and helped us in all of the assignments, provided us with proper guidelines, tutorials etc. through her Instagram handle which honestly sounded a great move to me. She also let us choose our own teammates that made it easier for us to accomplish the tasks easily within time.

To me the only drawback of the course was using Myline which was little difficult to set up and find the required section and quizzes.

After 4 months of studying this course I will surely miss our beloved lecturer and working with all my team members.
