

THE ROLE OF SCIENCE IN OUR LIFE

Importance of Science in Our Daily Life Science is very essential in our daily life . We use science in day to day life . We wake up and use paste and brush which both are given by science . We use science in cooking , eating , clothing etc. Baking involves basic knowledge of science and baking machines such as oven , microwave are endowments of science . Can you imagine your life without electricity ? If no , then u must know that electricity is also given by science . Examples of use of science in everyday life are as follows

- We use cars , bike or bicycles to go from one place to another , these all are inventions of science .

- We use LPG gas , stove etc. for cooking , these all given by science .
- Even the house in which we live is a product of science .

Uses of Science in Different Fields

- **In agriculture** :-In the field of agriculture , science has made its mark by contributing so much . In present days machines are available even for sowing the seeds on fields . Tractor , thresher , drip irrigation system , sprinkler irrigation system etc. all are given by science . All fertilizers are also given by chemical science

- **In medicine :-** The medical field is based entirely on usage of science . All the drugs are given by medicinal chemistry . Tools used in the medical field are also given by science . Machines such as stretchers , ECG machine , MRI machines even injections are invented by science .

- **In transportation** - All the vehicles are invention of science . Science has made the world a small place . You can reach from Kashmir to Kanyakumari in just few hours . Cycle , scooter , cars , aircrafts etc. all are inventions of science . We can transport goods easily and faster by the use of machines given by science .

- **In communication** - Science has made the world very small . You can talk to anyone anywhere in fraction of seconds . Telephones , mobile phones etc. all are the inventions of science . All these medium of communications are available at very low cost as well . So , all are in the reach of common man . Science has made is very easy and cheap to talk to someone using a mobile phone .

- **In construction** - Science is the base of all buildings constructed by us . Construction of buildings is completed based on the technology given by science . Machines used in the construction work such as motor graders , bulldozers , backhoe loaders etc. given by science .

- **In photography** - Science has given many machines for photography . Now a days it's very easy to click a picture . Camera has been inserted even in your small mobile's phones . Apart from these , science has given many machines which are useful in each and every aspect of our life such as computers . Thus , science has vast use in all fields of human life . It is of great importance to make our life easier it gives answer of all
