CONCLUSION

Studying statistics and reports, the number of accidental deaths due to untimely treatment is increasing in most cases. In one of the reports, the health ministry said there were recent incidents where an ambulance had not arrived late or was ill, resulting in two deaths. Thus, our goal is to reduce mortality. The most difficult task is to implement the solution to keep the process going. So, our team has decided to bring the software so that the victims can use it and receive at least the necessary emergency treatment before it is too late. Software surf zone utilizes qualified and inventive people who have the vital aptitudes and a long time of involvement to reply to today's challenges.
